Product Leader

# AUTONOMOUS AGENT

A computer helper that works on its own without you telling it every step.

## Analogy:

Like having a magical robot buddy who knows your chores, starts them every morning, and finishes them perfectly while you're still eating breakfast.

## Use Case

A shopping bot that finds the cheapest price for your toys.

Greg Coquillo
Product Leader

# GOAL SETTING

Telling the AI what you want it to do.

## Analogy:

Like giving a treasure hunter a detailed map and clues, so they know exactly what to look for and where to start digging for the prize.

## Use Case

Asking AI to finish your homework summary by dinner.

Greg Coquillo
Product Leader

# PLANNING

AI makes a step-by-step list to finish the job.

## Analogy:

Like a chef writing down every step of a recipe before cooking, making sure no ingredient is missed and every step is followed in the right order.

## Use Case

AI plans how to research and write your science project.

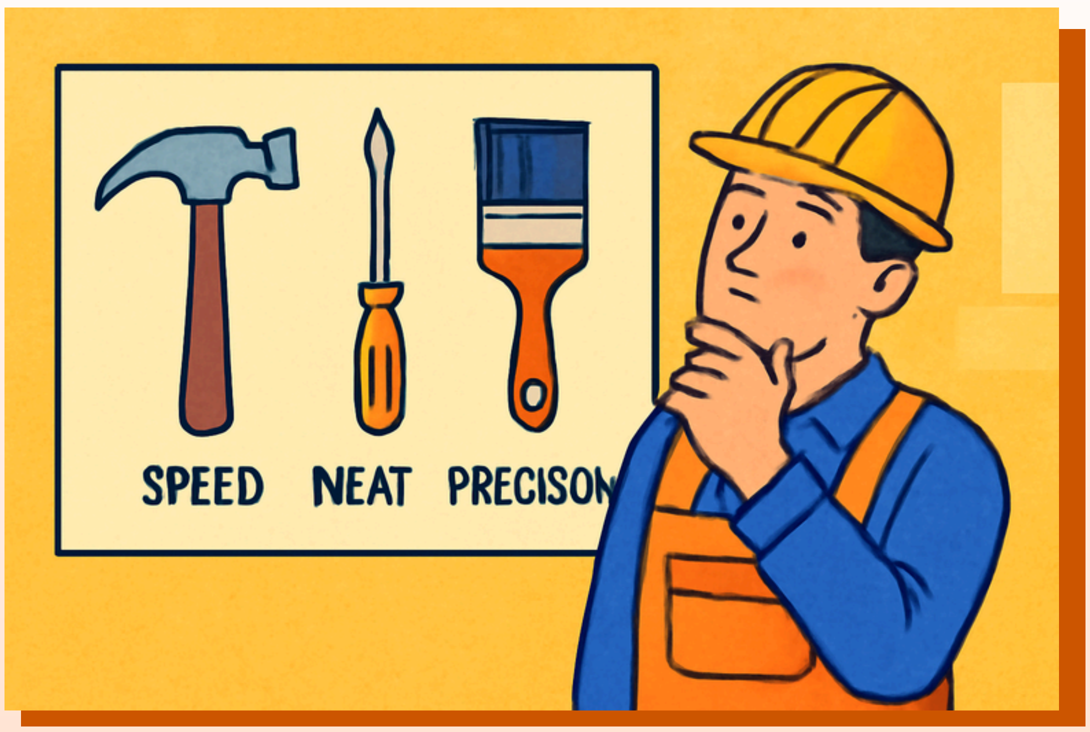
Greg Coquillo
Product Leader

# TOOL USE

AI uses special programs or apps to help it work.

## Analogy:

Like a builder choosing the perfect hammer, screwdriver, and paintbrush so each job is done faster, neater, and exactly the way it should be.



## Use Case

AI uses a weather app to plan your picnic.

Greg Coquillo
Product Leader

# CONTEXT GATHERING

AI looks for the right information before starting.

## Analogy:

Like reading the rules of a game carefully and looking at the board so you understand how to play before making your first move.

## Use Case

AI collects facts for your history project.

Greg Coquillo
Product Leader

# MULTI-STEP REASONING

Thinking through many steps to solve a big problem.

## Analogy:

Like solving a giant jigsaw puzzle by sorting pieces into corners, edges, and colors, then fitting them together until the whole picture is complete.

## Use Case

AI fixes a computer bug by checking code step-by-step.

Greg Coquillo
Product Leader

# DECISION MAKING

Choosing the best option after thinking about choices.

## Analogy:

Like deciding which playground slide to go on by checking how tall it is, how fast it looks, and how much fun other kids are having.

## Use Case

AI chooses the best route for a delivery truck.

Greg Coquillo
Product Leader

# ADAPTATION

Changing the plan if something unexpected happens.

## Analogy:

Like planning a picnic but switching to an indoor movie day when it rains, making the best of the situation without wasting the day.

## Use Case

AI changes your study plan if the test date moves.

Greg Coquillo
Product Leader

# MEMORY

Remembering past work to do better next time.

## Analogy:

Like remembering which hiding spot in hide-and-seek worked best so you can use it again and win more games with your friends.

## Use Case

AI remembers your favorite bedtime story order.

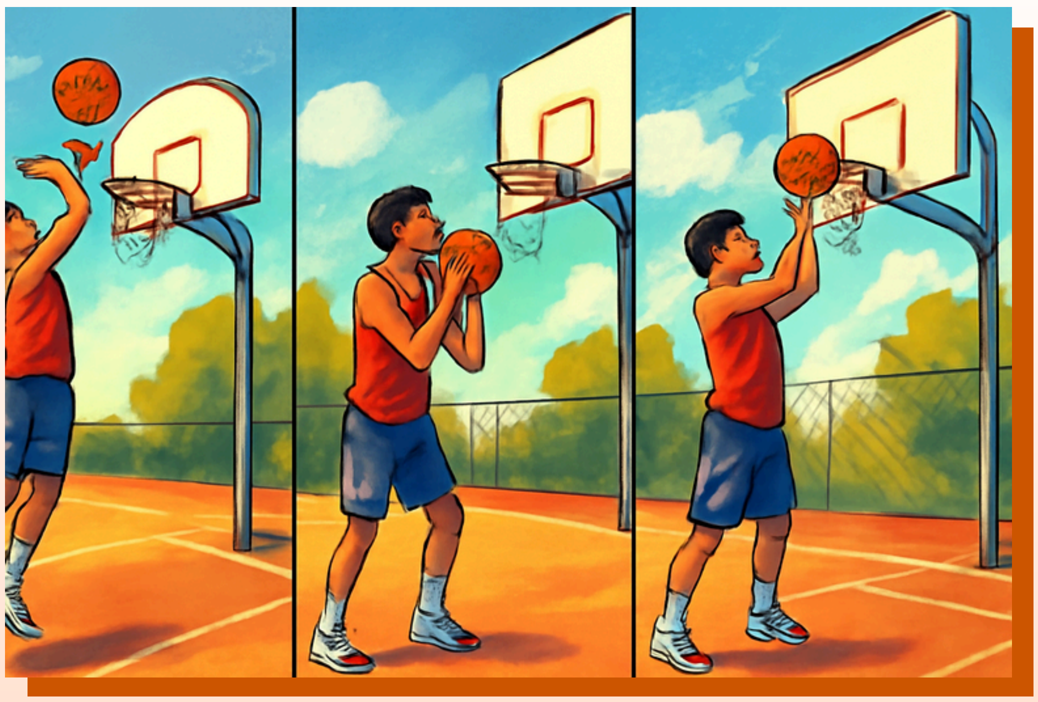
Greg Coquillo
Product Leader

# LEARNING LOOP

AI gets better by learning from mistakes.

## Analogy:

Like practicing basketball, missing a few shots, then adjusting your aim and hand position until you start scoring almost every time.



## Use Case

AI learns to recommend better movies based on your likes.

Greg Coquillo
Product Leader

# TASK AUTOMATION

Doing the same job over and over without getting tired.

## Analogy:

Like a dishwasher that washes plates perfectly every night, without complaining, skipping steps, or asking you to explain how to do it again.

## Use Case

AI sends reminders for your homework every week.

Greg Coquillo
Product Leader

# SELF-IMPROVEMENT

AI upgrades itself to do a better job.

## Analogy:

Like a video game character that gets stronger, faster, and smarter each time you play, unlocking new powers and tools to win more challenges.

## Use Case

AI learns faster ways to answer your questions.

Greg Coquillo
Product Leader

# INFORMATION RETRIEVAL

Finding the right information from a big library.

## Analogy:

Like searching a giant bookshelf with thousands of books but finding the exact one you need in seconds because you remember where it's stored.

## Use Case

AI searches online to answer "How do volcanoes work?"

Greg Coquillo
Product Leader

# CHAINING TASKS

Doing tasks in the right order so they work together.

## Analogy:

Like getting dressed in the morning — socks before shoes, shirt before jacket — so everything fits and works the way it's supposed to.

## Use Case

AI sends invites after booking a party venue.

Greg Coquillo
Product Leader

# ERROR HANDLING

Fixing mistakes or problems that come up.

## Analogy:

Like baking cookies, realizing you forgot the sugar, then quickly mixing it in before putting the tray back in the oven to save the recipe.

## Use Case

AI retries sending an email if Wi-Fi drops.

Greg Coquillo
Product Leader

# PRIORITIZATION

Doing the most important things first.

## Analogy:

Like doing your homework before playing video games so you can enjoy your games without worrying about schoolwork waiting for you.

## Use Case

AI finishes urgent homework before less important chores.

Greg Coquillo
Product Leader

# MULTI-AGENT COLLABORATION

Many AIs working together on different parts of a job.

## Analogy:

Like a school project where one friend makes the poster, another writes the speech, and another designs the presentation — all working toward the same goal.

## Use Case

One AI writes your essay, another finds pictures.

Greg Coquillo
Product Leader

# ENVIRONMENT AWARENESS

Knowing what’s happening around it.

## Analogy:

Like noticing it’s windy before flying a kite so you can pick the perfect spot where it will soar high and not get stuck.

## Use Case

AI pauses a delivery if there’s a traffic jam.

Greg Coquillo
Product Leader

# FEEDBACK LOOP

AI asks for and uses feedback to improve.

## Analogy:

Like drawing a picture, showing it to a friend, and then adding more color or fixing shapes based on what they suggest.

## Use Case

AI changes your workout plan after you say it's too hard.

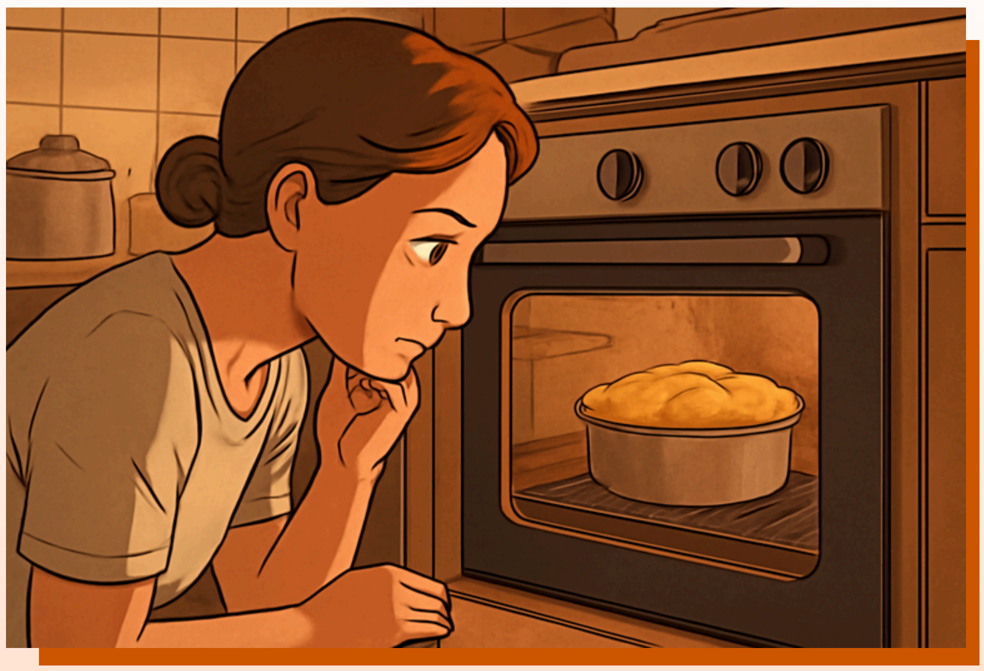
Greg Coquillo
Product Leader

# EXECUTION MONITORING

Watching to see if the job is going well.

## Analogy:

Like checking your cake in the oven every few minutes to make sure it's not burning and rises perfectly.



## Use Case

AI tracks your package until it reaches you.
